

Congress and the FCC are supposed to guard AGAINST monopoly power, NOT ENABLE it! This well-veiled upcoming rule change would degrade the landscape for all media for decades, and usher in an era in which a few corporations control our news. This dangerously promotes monopoly of the airwaves and other media, and provides the atmosphere to gain control of citizens through lack of differing points of view. To further degrade diversity is not only un-American and un-democratic, it is downright oligarchial, if not totalitarian. Just who is the FCC supposed to be helping... the rich & powerful, or We the people???
